

The background of the journal cover is a composite of microscopic images. The upper half features a dense field of red, textured, spherical and oval-shaped structures, possibly representing cells or microorganisms. The lower half shows a glowing, translucent blue and purple DNA double helix structure, with several purple, bean-shaped molecules (possibly proteins or lipids) attached to it. The overall color palette is dominated by reds, purples, and blues, creating a scientific and high-tech aesthetic.
